

3. (Amended) The method of Claim 1 wherein the fog is generated in a fog chamber, and further comprising the act of holding the fog in the fog chamber for a predetermined time.

Sub 11. (Amended) A tanning system that generates a fog with a tanning solution, comprising:

a fog chamber;

a pump system in fluid communication with the fog chamber; and

a control system coupled to the pump system, the control system providing at least one function other than coin-receiving and time-delay.
